International Colloquium on Energy Storage

“The promise of Energy Storage : it will change our life !”

Brussels – 8th November 2017 – University Foundation

The energy storage market is on the rise, with the development of new and more efficient technologies. This will, not only have a deep impact on the way energy – and particularly electricity – is produced, distributed and consumed, but also bring about new economics for the whole sector. Within a decade, energy storage systems will become common equipment for both companies and individuals.

At this colloquium, you will gain a state-of-the-art insight in the most recent developments and prospects, thanks to specialists from academia and industry, among which we have already received the consent of :

- Prof. dr. ir. Johan DRIESEN (KU Leuven, Electrical Engineering Department - ESAT)
- Dr. ir. Sébastien BORGUET (CMI Energy – Seraing)
- Prof. dr. ir. Jean-Luc DELPLANCKE (ULB – Polytechnical School – Materials & Electrochemistry)
- Prof. dr. An HARDY (University of Hasselt – Inorganic & Physical Chemistry)
- Ir. Hans VANDERSYPPE (Industrial Energy Solutions – Business Unit Generation – ENGIE)

We are still waiting for the consent of two or three other potential speakers.

Save the date !

More information will soon be available on SEII's website : www.seii.org.
